

OBOA Education Development Contributors/Subject Matter Experts

*Are you a code geek with technical expertise and some spare time?
Do you have a passion to help develop the next generation of building practitioners?
Are you creative with an eye for detail and interest in training development?*

OBOA needs YOUR EXPERTISE in 2019!

What we are looking for: Subject Matter Experts
What we will pay: Hourly rate dependent on project funding
Application timing: March 1, 2019

The OBOA Education Committee is clearing the decks and updating our database of subject matter experts. We are soliciting interest from individuals who have expertise in the technical or administrative aspects of building codes to assist in the further expansion of our educational platform. We do have some funding available, so participation can be compensated on an hourly per project basis.

Specifically, we are looking for individuals interested in participating in projects such as the development and maintenance of our own training materials as well as development and conversion of training materials targeted to the national level.

If you have participated on projects in the past, or if this is of interest to you, please complete the attached form, attach your resume and email back to my attention so that we can update our records.

I look forward to working with our subject matter experts and the Education Committee to advance the training needs of professional building officials!

Warm regards,

Lynn C. Balfour, CBCO MAATO AScT

Director, Education Development
