

The OBOA is currently looking for expressions of interest for:

## Subject Matter Experts

The OBOA is currently looking for technical Subject Matter Experts to help support the OBOA Education Committee as we prepare for the next edition of the Ontario Building Code. We are soliciting interest from individuals who have expertise in the technical or administrative aspects of building codes to assist in the further development and updating of our educational platform.

Specifically, we are looking for individuals interested in participating in projects such as the development and maintenance of our own training materials as well as development and conversion of training materials targeted to the national level. Participation will be compensated on an hourly or per project basis.

If you have participated in projects in the past, or if this is of interest to you, please complete the form at the below link.

[Click Here to Express Interest](#)

We look forward to working with our Subject Matter Experts as we advance the training materials for the needs of professional building officials and designers. Only those applicants selected will be acknowledged. Accommodations are available on request for candidates taking part in all aspects of the selection process. Please notify Jonathan DeWeerd if you require any accommodations.

Expressions of interest will be received until October 12, 2023

Please direct any questions to:

Jonathan DeWeerd, CBCO, C.Tech.

Director of Education
